LIVE CODING CLASSES FOR KIDS, TEENS & BEGINNERS

WEB

COURSE 03 OF 12
CURRICULUM GUIDE

Web Development for Kids & Teens

Building complete, responsive websites

GRADE BAND

Grade 8–12

DIFFICULTY

Beginner

DURATION

14 weeks · 2 sessions/week

ABOUT THIS COURSE

Course Overview

Structure, style and interactivity come together. Students design and build complete, responsive websites with HTML, CSS and JavaScript — and publish them live on the internet.

GRADE BAND Grade 8–12	DIFFICULTY Beginner	DURATION 14 weeks · 2 sessions/week
---------------------------------	-------------------------------	---

Prerequisites: JavaScript for Kids & Teens (or equivalent) recommended.

LEARNING OUTCOMES

What Students Will Learn

- Structure semantic, accessible web pages with HTML5
- Style layouts using modern CSS — Flexbox and Grid
- Build responsive designs that work across devices
- Combine HTML, CSS and JS into complete interactive websites
- Use browser dev tools to inspect and debug layouts
- Deploy a live website to the internet

WHAT WE'LL USE

Tools & Technologies

HTML5 CSS3 JavaScript Git & GitHub GitHub Pages / Netlify

CURRICULUM

Module-by-Module Breakdown

MODULE	FOCUS
01 · HTML Foundations	Semantic structure, tags, forms, accessibility basics.
02 · CSS Foundations	Selectors, the box model, typography, color.
03 · Layout with Flexbox	Navigation bars, cards, flexible one-dimensional layouts.

MODULE	FOCUS
04 · Layout with Grid	Multi-section, two-dimensional page layouts.
05 · Responsive Design	Media queries and mobile-first design.
06 · JavaScript Integration	Forms, validation and interactive components.
07 · Git & GitHub	Version control basics, commits, pushing to GitHub.
08 · Deployment & Capstone	Publishing a live site; final portfolio project.

LEARNING BY BUILDING

Projects Students Will Build

- Personal Portfolio Website — A full site build — the program's signature first project.
- Responsive Landing Page — For a fictional product or business.
- Multi-Page Website — With navigation, forms and consistent layout.

BEYOND THE SYNTAX

Skills Developed

Responsive design Layout systems Semantic HTML Git & GitHub Deployment

PORTFOLIO OUTCOME

A live, deployed personal portfolio website — the student's first real public project — with source code on GitHub.
