LIVE CODING CLASSES FOR KIDS, TEENS & BEGINNERS

RX

COURSE 08 OF 12
CURRICULUM GUIDE

React JS for Teens & Beginners

Modern, component-based user interfaces

GRADE BAND

Grade 9–12

DIFFICULTY

Beginner–Intermediate

DURATION

10 weeks · 2 sessions/week

ABOUT THIS COURSE

Course Overview

React is the library behind most professional web applications today. Students learn to think in components and build the kind of interactive interfaces used in real products.

GRADE BAND Grade 9–12	DIFFICULTY Beginner–Intermediate	DURATION 10 weeks · 2 sessions/week
---------------------------------	--	---

Prerequisites: Web Development for Kids & Teens (HTML/CSS/JS fundamentals).

LEARNING OUTCOMES

What Students Will Learn

- Understand why component-based UI development matters
- Build and compose reusable React components
- Manage dynamic data with props and state
- Handle user events and forms in React
- Fetch and display data from an API
- Build and deploy a complete React application

WHAT WE'LL USE

Tools & Technologies

React JavaScript (ES6+) Vite npm Git

CURRICULUM

Module-by-Module Breakdown

MODULE	FOCUS
01 · Why React? & Setup	Component thinking; project setup.
02 · JSX & Components	Building your first components.
03 · Props	Passing data between components.

MODULE	FOCUS
04 · State & Hooks	useState and interactivity.
05 · Events & Forms	Handling user input.
06 · Fetching Data	useEffect and working with APIs.
07 · Component Composition	Building a multi-component application.
08 · Capstone & Deployment	Polishing and publishing a React app.

LEARNING BY BUILDING

Projects Students Will Build

- Interactive Dashboard / Widget App — Component composition and state.
- API-Connected App — E.g. a weather app or movie search tool.
- Capstone React App — A multi-page, multi-component application.

BEYOND THE SYNTAX

Skills Developed

Component architecture State management API integration Modern JS tooling

PORTFOLIO OUTCOME

A deployed React application with a live link and a GitHub repository.

RECOMMENDED NEXT STEP
